

20.4. Our projections for High School entries are shown in the table and graphs below. These show a clear underestimate by the Borough of 222 in 1986 and a staggering underestimate of 590 in 1992.

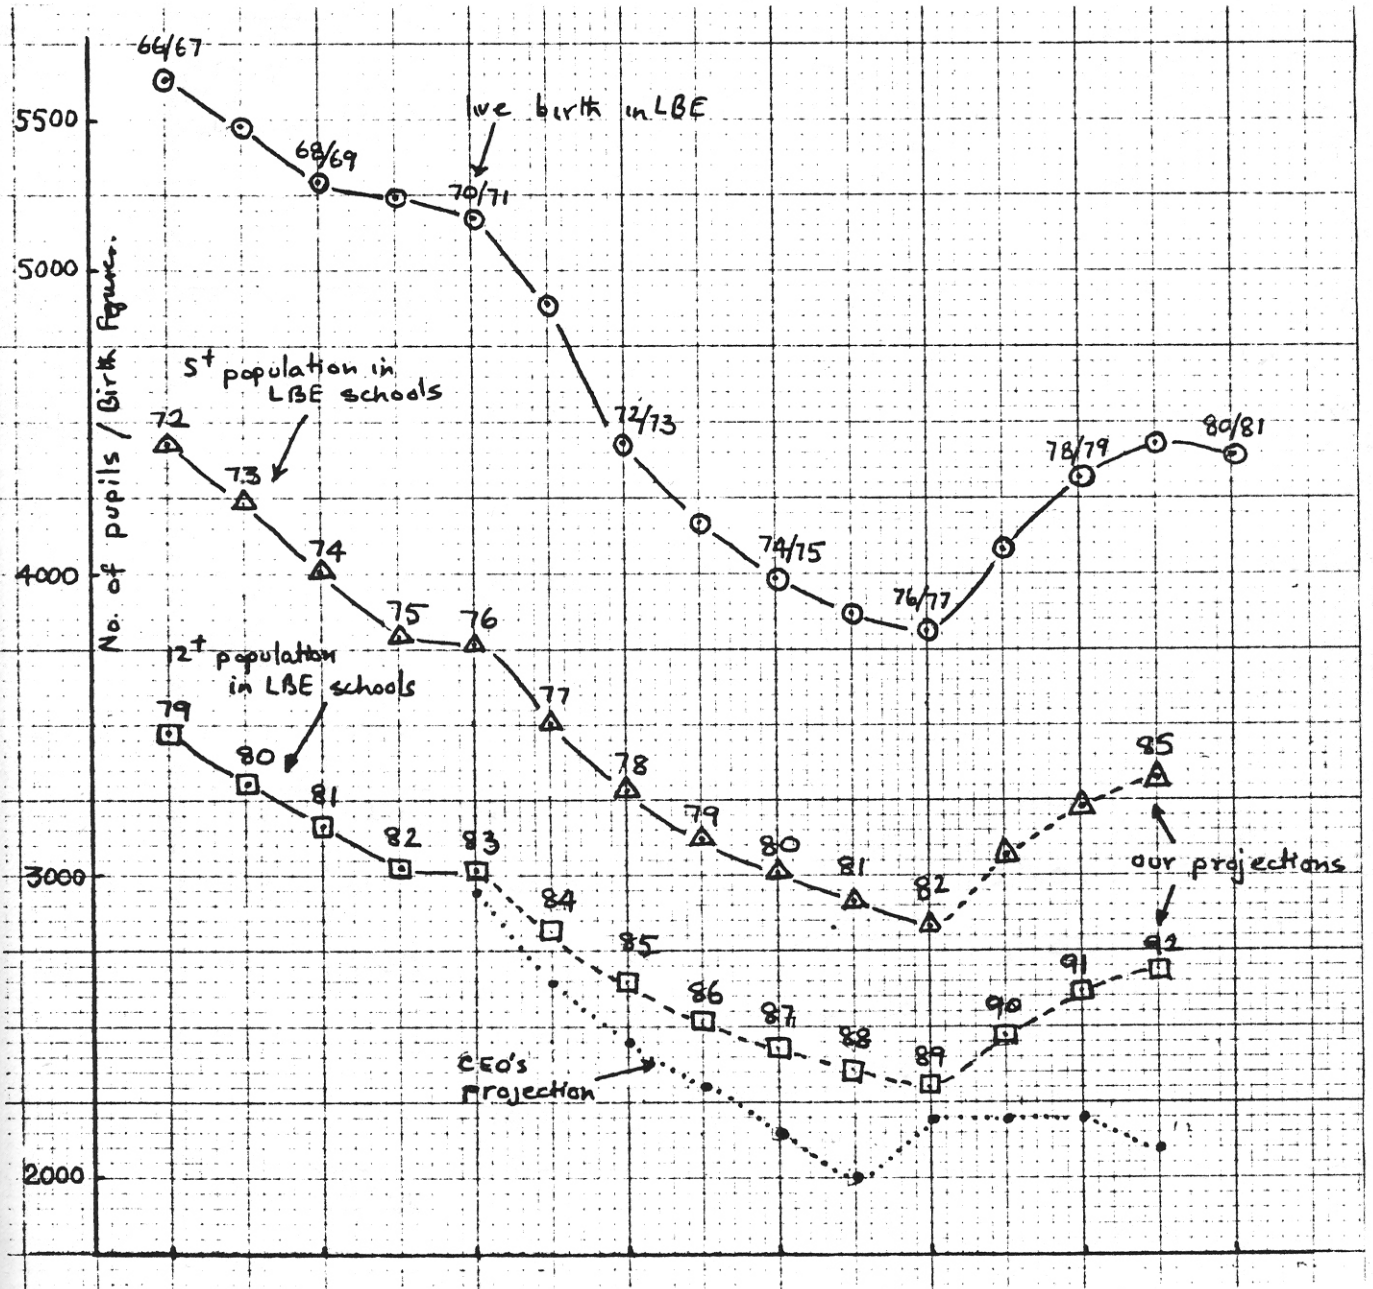

Fig.7. Correlation between birth rate, five-plus population and twelve-plus population in the LBE maintained schools. The live birth figures are normalised to match the school year, as explained in the text, see table 2. The total five-plus schoolroll in LBE maintained school are the actual figures upto 1982, the figures for the next three years are projections based on our findings, as shown in fig.1. The graph for the twelve-plus figures shows actuals upto 1983. Our projections are based on the present analysis, as given in table 3 and figs. 1 and 6. The CEO's projections are shown as the dotted line.
